How does a unilateral limit increase benefit you?

- This ensures that the limits on your credit cards are automatically adjusted to the appropriate levels.
- To have your limit increased usually means paperwork. However, by taking up this option under the National Credit Act, you do not have to fill in any forms or submit any documents.
- Your limit is adjusted without you having to call us and applying for an increase.
- There is no cost for taking up this option. Standard costs apply for the limit you use.
