see money differently

NEDBANK

How Nedbank Enterprise works

- Requires **integration with and access** to development resources.
- Runs on **any operating system**.
- Allows any **client-to-merchant authorisations** and settlements.
- Allows for **central processing** of client payments from any channel.
- Accepts **all local and international** Mastercard, Visa, American Express® and Diners Club International cards.
- Has a **userfriendly web interface**.

To find out more about **Nedbank ePay Solutions**™ talk to your **Nedbank banker,** visit **www.nedbank.co.za/MPS** or call the Nedbank Merchant Helpdesk on **0860 114 966.**

Why you should use Nedbank Enterprise

- You are in **complete control** of the payment process.
- You can select optional **email confirmation** on completion of a transaction.
- Transactions are processed in **realtime**.
- You can tailor the range of settings to **suit your business requirements best**.
- You can view a **full transaction history** for the previous six months and reconciliation reports.
- It makes use of **3D Secure technology** and **tokenisation** for enhanced security.

Nedbank ePay Solutions is built exclusively for Nedbank by iVeri Payment Technologies. For more technical information and specifications go to forum.iveri.com.
